

Application Software Engineer - Lyngby

– Would you like to join a leading manufacturer of communications technology for the airline industry?

This is your opportunity to take your career to the next level as a APPLICATION SOFTWARE ENGINEER at Cobham Aerospace Communications in Lyngby, Copenhagen.

Cobham Aerospace Communications

Cobham Aerospace Communications is a tele-communications company, where the main purpose of their technology is to keep people safe and connected in the air. Big airline manufactures, as Boeing and Airbus, and airline operators, as Singapore Airlines, trust Cobham Aerospace Communications to help them, as they have what it takes to develop and deliver one the most ambitious satcom communications systems for the airline industries.

The job

Cobham Aerospace Communications is recruiting a Application Software Engineer to join their aero software engineering team in Lyngby. you will be part of an agile team consisting of 30 colleagues in Lyngby, being Cobham Aerospace Communications' Global Software Team.

Your main tasks will be software design, verifying software requirements, software implementation, software validation and verification for functional and non-functional requirements.

Working as Application Software Engineer means:

- Developing advanced satcom systems for Aircrafts
- Implementing Interfaces to Aircraft equipment
- Developing advanced technology and integration to many hardware and software components from RF signals to voice and data services
- Making advanced embedded software systems with focus on functionality, safety, and security
- Implementing new features to satcom aero products and developing the next generation
- Giving technical support to airline customers
- Tools: Git, Gerrit, Make, Jenkins, C/C++, Linux and general Open Source

Your Qualifications

As an Application Software Engineer, your qualifications should ideally be:

- Master or BSc in Software Engineering, Computer Science or similar education
- Experience with C and C++ programming
- A structured and disciplined working method
- Knowledge of Git, Gerrit, Make and Jenkins
- Experience with data communication and network protocols
- Experience with requirement driven design and validation process

We Offer

You will be working with next-generation aerospace communications systems and as the right candidate you will get the possibility to highly influence the architecture and design of the new systems. Starting your career at Cobham Aerospace Communications means that you will be surrounded by peers, who are experts in their field, where you can learn from the best and gain relevant skills to adapt to this continuously changing world.
