Do you want to join one of the World leading manufacturers of communication and satellite equipment on a fantastic transformational journey?

Cobham Satcom is a world leading manufacturer of satellite communication equipment, and this industry is growing very fast worldwide. Cobham Satcom has its Headquarter with about 300 employees situated in Lyngby, Denmark.

About Cobham Satcom

Cobham Satcom is a global tele-communication company where the main purpose of their technology is to keep people safe and connected in the remotest areas both at land and at sea. Big tech companies trust Cobham Satcom to help them bring internet connectivity to remote communities, as they have what it takes to lead and deliver on the most ambitious communications projects. At Cobham Satcom, the vision is to be the leader in remote connectivity, safeguarding and connecting people and ideas. This gives meaning to the work of all Cobham Satcom's 553 employees worldwide on an everyday basis. For passionate people looking for autonomy and exciting career opportunities, Cobham Satcom truly has something to offer.

Our satellite and radio communication terminals perform in the most challenging and remote environments on land and at sea. We design and manufacture these high-performance products under the, EXPLORER, SAILOR and Sea Tel brands providing customers with outstanding performance, value and support through our global sales and service network.

The job

Cobham Satcom is looking for a Quality Engineer. This role will be based in Lyngby, Denmark.

As a Quality Engineer your key responsibilities will be:

- Participation in various type of product development reviews and audits
- Lead/Support all non-conforming part/product activities and support related QA engineering change activities
- Conduct Root Cause Analyses, internal and external reporting to enable corrective and preventative action, with the aim of minimising product non-conformance
- Record, monitor and regularly report on product non-conformance
- Identify areas of improvement in Quality Management Systems & tools and implement appropriately in line with the objectives of the Product Assurance Manager
- Develop various data sources to monitor product performance and ensure regular reporting of this data, identifying early trends in deviation and product defects
- Manage customer returns/issues and maintain regular dialogue with customer to ensure timely closure. Follows up to ensure satisfaction of all customer requirements
- Handling of regulatory requirements e.g.:
 - Designated ATEX Authorized Person. Approver of all ATEX ECO and DCO's
 - Handling of ATEX MRB's
 - Working with 14001 projects

As a Quality Engineer your qualifications should ideally be:

- Min BS.E.E or BS.M.E with minimum of 2-5 years experience from a quality department.
- Demonstrated experience with Quality Systems and regulatory standards
- Auditing experience
